

Grain/ Sugar Sanding Machine, Sugar Coating Machine With Double Layer Structures

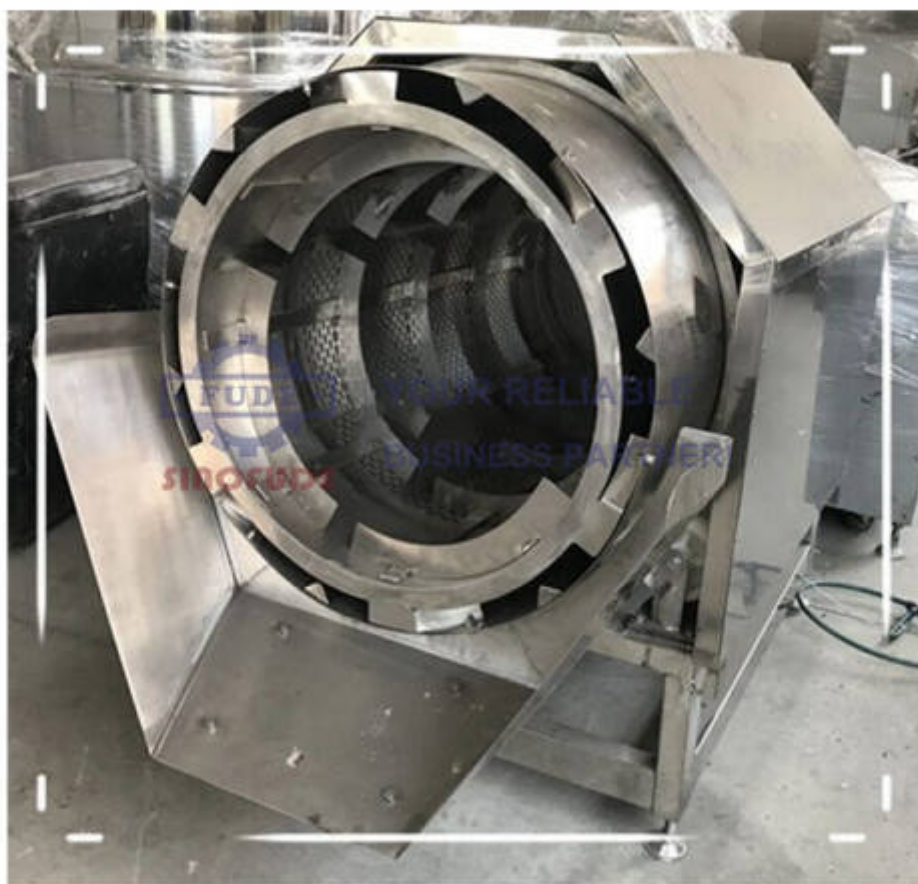

Specifications :

Payment Terms	L/C T/T Western Union
Keyword	Sugar Coating Machine, SUGAR SANDING MACHINE

Detail Introduction :

Sugar Coating Machine(SUGAR SANDING MACHINE)

Product Description

Sugar Coating Machine Introduction

The sugar coating machine (sugar sanding machine) is a part of the Gummy Machine, and is newly designed and manufactured by SINOFUDE, its a necessary device for coating the sugar on the starchless formed or mogul line formed jelly/gummy candy or marshmallow or other products that need to be coated by sugar or other grains. Sugar coating machine is made of Stainless Steel SUS304/SUS316 (optional) rotating drum. It is double layer structure, there is holes in the inner drum, and when normal production, the rest of sugar will be recycling used till all sugar are coated on candies. The sugar coating machine is also optional equipped with sugar feeding devices by time control for continuous production. The steaming conveyor can be added also for better coating as optional items.

Easy and continuous operation, easy cleaning and evenly sugar coating are main advantage characters of SINOFUDE's sugar coating machine.

Model	Capacity	Power	Dimension	Weight
